

Augmented Reality Product Showcase for Magento 2

Product Specification

The extension showcases products within an immersive 3D environment, enabling customers to visualize how the product will appear in their preferred space. Also Support 3D product view.

Features

Here is a comprehensive list of the features included in the AR extension:

- **Interactive 3D Viewer:** Display products in a dynamic 3D environment, allowing customers to rotate and zoom for a comprehensive view. Also allow customers to shop for items using a three-dimensional perspective.
- **Responsive Design:** The 3D viewer is optimized for various screen sizes and devices, ensuring a seamless experience across desktops, tablets, and smartphones.
- **Easy Integration:** Integrate the module seamlessly into your Magento 2 store with simple installation steps.
- **Cross-browser Compatibility:** Browser with WebXR support.
- **Product Type:** It works only with simple and configurable products.
- **File Type:** It works only with GLB and GLTF files (support zip file).
- **Multistore:** It also works with the multistore view.

Admin Panel Configuration

Stores -> Configuration -> Pits Configuration -> AR Product View

General Settings

Enable <small>[store view]</small>	Yes	▼
Button label <small>[store view]</small>	3D View	
3D View Background Color <small>[store view]</small>	rgb(187, 187, 187)	

Figure 1: Admin panel configuration

Figure 1. displays the admin configurations of the extension, which specifies location or placement of the Product Designer feature.

General Settings

- **Enable** – Enable / Disable module.
- **Button Label** – The text of the button which show on the frontend can be changed here.
- **3D view Background colour**- The default background colour for 3D view popup.

How It Works in Backend

Administrators can add the 3D file in Product Add/Edit page. On this page, there exists a section named '**AR Product View**.' Within this section, an attribute named '**3D Graphic file**' is provided, allowing administrators to add the 3D GLB or GLTF file up to size 20MB. Also have attribute for background colour '**3D Image Background Colour**' to change the background colour for a specific product.

The screenshot shows the 'Christmas tree' product edit page. The 'AR Product View' section is expanded, revealing two main configuration options:

- 3D Graphic file** (global): Includes a 'Choose file' button, a 'No file chosen' status, and a link to 'product_2045/christmas_special_2.glb' with a 'Delete' option. A note below states: 'Only support file GLB or GLTF. Make sure your file isn't more than 20M.'
- 3D Image Background Colour** (store view): A color picker showing a greenish-grey color with the hex code 'rgb(168, 208, 152)'.

Other visible sections on the page include 'Product in Websites', 'Product Salable Quantity' (with a help icon), 'Design', 'Schedule Design Update', 'Gift Options', and 'Downloadable Information'.

Figure 2 – Product Edit Page with AR view options

How It Works in Frontend

When customers visit a product page with an added 3D file, they will see two buttons (Figure 4): one for a 3D view and another for an AR view. Clicking the **3D View** button opens a popup (Figure 5) where customers can see the product in a 3D view. When the customer clicks the **Start AR** button (available only in mobile view or on web browsers that support WebXR or similar technologies), it opens the AR product view (Figure 6).
